Hi Karen,

Please find the attached letter from DPHHS that details our review of the ambient air data collected in the spring and summer of 2019 in Butte, Montana. After full review and analysis of the data, all average metal concentrations in the ambient air were well below health-based screening levels. DPHHS recommends that Butte-Silver Bow Health Department share these conclusions with the community. The intention of our letter is to help you as you continue to navigate the concerns of the community and work to identify other potential sources of exposure that the community is concerned about.

Please contact me if you have any additional questions or need assistance.

Take care and stay well,  
Laura
